Office, 287 Essex Street, Salem, Mass.

## Hardy Stock Only

Rhododendrons—Kalmias—Andromedas—Azaleas
and other Ericaceæ—Specimen Evergreens—Trees
—Shrubs—Vines—Ferns—Herbaceous Perennials

## **BOXFORD NURSERY**

THIS IS A PRICED CATALOG of my Boxford Nursery, located at Boxford, Mass. Here may be seen growing the choicest collection of Specimen Nursery Stock, selected for the most discriminating buyers. Special attention is given to Hardy Native Material, which must always be the basis of successful permanent plantings.

**SPECIMEN STOCK.** There is a growing demand for fine specimen stock in Conifers, Rhododendrons, Kalmias, Andromedas, and other evergreens, and my Boxford Nursery is established to supply just this need which has been felt so long.

**PRICES** are made to fit the quality of stock sent out. Few realize that the real value of nursery stock is largely **underground**. Frequent transplanting, and handling specimens with adequate burlaped balls, means success and quick results. It costs more, but it is the fixed policy of my Boxford Nursery; and "cheap" stock will not be handled or sent out. **The Best is always the Cheapest.** 

**PACKING CHARGES FREE** for shipment by Freight or Express. Team and auto delivery to North Shore or Boston points at **net cost**.

At my **HIGHLANDS NURSERY**, Pineola (Saginaw P. O.), North Carolina, 3800 ft. elevation, on the crest of the Alleghany Mountains, one may see Rhododendrons, Azaleas, Leucothoes, Kalmias and Andromedas growing in all sizes by tens of thousands in single species, and nowhere else can be found such a collection of Rare American Plants of unquestionable hardiness—the best for American Gardens.

**THE CAROLINA MOUNTAINS** is the native home of the most beautiful Broad-leaved Evergreens and Ericaceous Shrubs. Highlands Nursery not only ships direct to customers, but is a great propagating plant, supplying material for my Boxford Nursery. A catalog of Highlands Nursery is sent on request.

VISITORS ARE ALWAYS WELCOME at both Nurseries or at my Salem office. Many customers take the trip to my Highlands Nursery in the Carolina Mountains during the blooming season of Rhododendrons and Azaleas. No such show can be seen elsewhere, and it is an outing worth while; I am glad to give details.

### RHODODENDRONS

RHODODENDRON ARBUTIFOLIUM. Dwarf Rhododendron. 8 to 10 in.

CAROLINIANUM (PUNCTATUM), Small or Early Flowering Rhododrendon.

Rhododrendon. The smallest Alleghanian species, though it often attains a height of 15 feet and is wide spreading. A very graceful shrub, with totally different aspect from the two species preceding. Leaves dark green, usually blunt and narrow, covered with rusty dots below, much smaller than either maximum or catawhiense. Flower-clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hillsides, standing exposure unusually well, and invaluable as a single specimen or for massing with the other species.

Until this year we have been sending this beautiful and rare

Until this year we have been sending this beautiful and rare species out under the name of punctatum. Prof. Sargent has recently called attention to the fact that it is a distinct species from the punctatum, differing in time of bloom, with more showy and profuse flowers, and making a much larger and finer plant than the punctatum.

It is now known as Rhododendron carolinlanum, being described and named by Alfred Rehder, Arnold Arboretum, Jamaica Plain Mass.

underneath for

underneath for years.

Unlike Rhododendron maximum, it is a very free bloomer, with foliage of a dark, rich, lasting green, which never rusts. The trusses are a bright red-purple (in marked contrast to the muddy purple of the semi-hardy half-breed imported variety noted above), and as sent out by Highlands Nursery are always on their own roots.

For massing to produce a broad-leaved evergreen landscape effect, there is no plant equal to it in the latitude of the Northern United States and Canada, where strictly hardy plants must be employed. As a rich, finished border to plantations of the commoner Rhododendron maximum and Kalmia latifolia, the value of Rhododendron catawbiense cannot be overestimated. mated.

Do not com	pare our many-st	temmed clumps	with the single-
stemmed, "bu	shy" half-hardy	Rhododendrons	offered by im-
porters. The	re is no compari	son. Each

## Rhododendrons and Kalmias by the Car Load.

Rhododendrons and kalmias delivered at your station by Rhododendrons and Raimias delivered at your station by the carload. To be shipped from point determined by me. For the area covered and effect produced, a "carload" of Rhododendrons or Kalmias is the cheapest landscape proposition offered. I ship an unusual grade of splendid clumps, each plant a specimen and burlapped separately. Don't accept cheap stock, thrown into cars without burlapping and with the fine, hair-like rootlets inevitably exposed. You will be disappointed and find it expensive in the end.

RHODODENDRON CATAWRIENSE

Each plant collected from the open and burlapped. Prices
f. o. h. your station, if east of the Mississippi River.
Car containing 200 clumps, 11/4 to 31/4 ft, for\$280.00
Car containing 300 clumps, 11/2 to 31/2 ft. for 380.00
Car containing 400 clumps, 1½ to 3½ ft. for 480.00
Car containing 600 clumps, 1½ to 3½ ft. for 600.00
Other combinations and sizes quoted on request.
Other combinations and sizes quoted on request.

RHODODENDRON MAXIMUM.

RHODODENDRON MAXIMUM.

Prices in carload lots, delivered f. o. b. your station, if east of the Mississippi River, "collected" from open ground, and each specimen burlapped separately.

Car containing 300 clumps, 1½ to 4 ft. for .....\$300.00 Car containing 400 clumps, 1½ to 4 ft. for .....\$75.00 Car containing 600 clumps, 1½ to 4 ft. for .....\$75.00 Other sizes or combinations will be made up to suit customers. It is far cheaper to buy my kind at slightly increased price and have plants that will grow.

RHODODENDRON MAXIMUM. Extra specimens.

For those wishing perfect specimens I can supply a few cars of "collected", extremely heavy plants.

Price on request.

quest.

RHODODENDRON MAXIMUM AND R. CATAWBIENSE.

In mixed car, delivered free at any station east of Mississippi River.

Car containing 150 maximum and 150 catawbiense, "collected" as above, 1½ to 4 ft. clumps — a total of 300 — for \$400. Car containing 250 maximum and 250 catawbiense, 1½ to 4 ft. clumps — a total of 500 — for \$550.00

Kalmia latifolia by carload.

Each specimen burlapped, and highest-class clumps collected" from open, delivered free at your station, if east of Mississippi River.

Car containing 400 clumps, 1 to 3½ ft. for \$375. Kalmia may be added to help fill any Rhododendron car at \$1.00 per

## HARDY HERBACEOUS PLANTS

We are prepared to supply any Hardy Herbaceous Perennials at reasonable prices which fit the quality of stock desired. Weak plants are cheaper but strong clumpy stock is always recommended. Special attention is called to my list of Hardy Ferns.

## LANDSCAPE DEPARTMENT

VISITS ARE MADE for consultation and advice, to make surveys, designing and planting plans. Entire construction, planting and carrying out of landscape work of all kinds undertaken, and charges will be found reasonable and consistent with good workmanship and permanent results.

THE WILD GARDEN. The basis of all the best landscape work of a permanent nature must be Native Plants and particularly where naturalistic effects are desired. If this fact is ignored tame and fleeting results will follow. I make a specialty of WILD GARDENING and my long experience is here of greatest value. Every garden or estate has its own peculiar problems and a discussion of details may prove helpful in unexpected ways.

# A Splendid American Conifer

Abies fraseri (Fraser's Fir)

Specimen Fraser's Fir on Grounds of Highlands Nursery

# Abies fraseri

## THE TRUE FRASER'S FIR

THE northern species, Abies balsamea, is almost worthless in any but the latitude of middle and northern Maine, as it becomes "leggy," thin, and is short-lived.

Fraser's Fir, however, is a distinct species from the highest peaks of the Carolina Mountains, and makes a perfect specimen lawn and screen tree, with dark-green, thick-set foliage (blue underneath) and compact, pyramidal habit. It is one of the choicest of all American conifers of the Fir section.

Hardy American Plants,

Salem, Mass., U. S. A.

Owner | Highlands Nursery | Boxford Nursery

A SUCCESSFUL RHODODENDRON BED

The first season, Garden of George W. Mieth, Hubbard Woods, Ill., planted Spring 1912 with small size material at total cost of \$65.90.

## EXACT LIST OF MATERIAL USED

The planting was made from suggestions and stock furnished by me and the edging of violets, was supplied from Mr. Mieth's own grounds. The planting is a successful typical grouping of Broad-Leaved Evergreens and "Filler Plants."

1 Rhododendron maximum, 2 to 3 ft. clumps. " 1½ to 2 ft.
" 1 to 1½ ft. clumps.
punctatum, 1 to 1½ ft. clumps.
catawbiense, 2 to 3 ft. clumps. 3 44 10 66 1 2 66 9 to 18 in. clumps. 10 5 Kalmia latifolia, 1 to 1½ ft. clumps. 6 to 9 in. clumps. 10 10 Leucothoe catesbaei, 6 to 12 in. clumps. 10 Aronia arbutifolia, 2 to 3 ft. 30 Xanthorrhiza apiifolia, 6 to 12 in. clumps. 5 Enonymus radicans. 1 Ampelopsis englemanni. 25 Dryopteris, in var. 10 Eupatorium ageratoides. 3 Azalea aborescens, 1 to 1½ ft. clumps. 10 " nudiflora, 6 to 12 in. clumps. 10 66 vaseyi, 6 to 12 in. clumps. 5 2 Andromeda floribunda, 6 to 12 in. clumps. 10 Aronia nigra, 1 to 2 ft. 5 Clethra alnifolia, 1 to 2 ft. 1 Chionanthus virginica, 3 to 4 ft. 5 Azalea viscosa, 1½ to 2 ft.

20 Lilium superbum, 1st size. 20 "canadense, 1st size.

Rhododendron catawbiense (true species) growing by thousands at Highlands Nursery, 3800 ft. elevation in the Carolina Mountains.
